

Top 30 Pathways for GOBP (Sorted by FDR)

GO:BP – cell adhesion

GO:BP – cell death

GO:BP – response to chemical

GO:BP – apoptotic process

GO:BP – response to peptide

GO:BP – programmed cell death

GO:BP – tissue development

GO:BP – biomineral tissue development

GO:BP – response to stimulus

GO:BP – circulatory system development

GO:BP – response to cytokine

GO:BP – neural crest cell migration involved in autonomic nervous system development

GO:BP – intramembranous ossification

GO:BP – positive regulation of cell migration

GO:BP – direct ossification

GO:BP – positive regulation of cell motility

GO:BP – positive regulation of cellular process

GO:BP – locomotion

GO:BP – positive regulation of locomotion

GO:BP – cell surface receptor signaling pathway

GO:BP – response to stress

GO:BP – odontogenesis

GO:BP – skin morphogenesis

GO:BP – positive regulation of biological process

GO:BP – collagen fibril organization

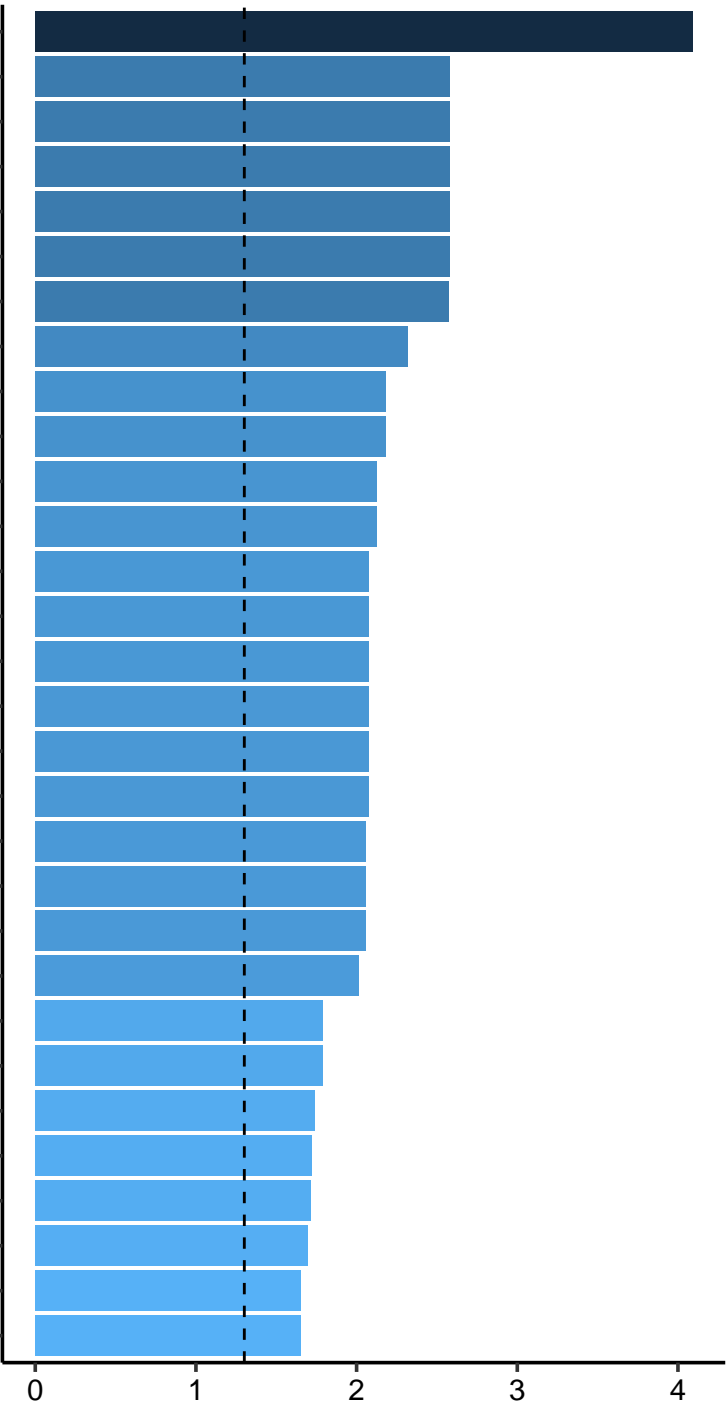

GO:BP – response to external stimulus

GO:BP – anatomical structure formation involved in morphogenesis

GO:BP – regulation of cell migration

GO:BP – cell migration

GO:BP – blood vessel development
